

Priyanshu Sajwan

Uttarakhand, India | priyanshusajwan6543@gmail.com | linkedin.com/in/priyanshu-sajwan | github.com/priyanshu25bai11245-bot

EDUCATION

Vellore Institute of Technology, Bhopal
B.Tech, Computer Science & Engineering (AI & ML)

Bhopal, India
2025 – 2029

TECHNICAL SKILLS

Languages: Python (Intermediate), Java (Learning), HTML
Tools & Platforms: Git, GitHub, VS Code, Linux (basics)
Concepts: Object-Oriented Programming, Data Structures (fundamentals), REST APIs

PROJECTS

Simple Finance Dashboard | *Python, Pandas, Matplotlib* | [GitHub](#) 2025

- Built an interactive dashboard to track and visualise personal income, expenses, and savings over time
- Parses CSV transaction data, categorises entries, and renders monthly bar and pie charts using Matplotlib
- Designed with a modular structure so new data sources can be added without changing the core logic

ChatBot | *Python, NLP, Rule-based Logic* | [GitHub](#) 2025

- Developed a conversational chatbot that responds to user queries using intent matching and pattern recognition
- Implemented a keyword-based response engine with fallback handling for unrecognised inputs
- Structured as an extensible class, allowing new intents and responses to be added easily

Digital Literacy Project | *Python, Web, Educational Content* | [GitHub](#) 2025

- Created an educational resource to improve digital literacy among students unfamiliar with basic computing
- Covers topics including internet safety, file management, and productive use of online tools

Performance Predictor | *Python, Scikit-learn, Pandas* | [GitHub](#) 2025

- Built a machine learning model to predict student academic performance based on study habits and attendance data
- Trained and evaluated a linear regression model achieving reasonable accuracy on test data
- Includes a simple CLI interface to input student data and receive a predicted score range

ACTIVITIES & LEARNING

VIT Bhopal Coding Club Bhopal, India
Member 2025 – Present

- Actively participate in internal coding contests, peer code reviews, and collaborative project sessions

Independent Learning Online
Python & AI/ML Coursework 2025 – Present

- Completed foundational modules in Python programming, data analysis, and introductory machine learning
- Currently expanding Java skills through structured self-study alongside B.Tech coursework
